SUMMARY

Junior Software Engineer with hands-on experience building and deploying web applications using React, Next.js, Node.js, and Express with RESTful APIs. Knowledgeable in frontend and backend development, with experience using MongoDB and foundational knowledge of MySQL. Backed by a background in network engineering, bringing strong troubleshooting skills and system-level thinking. Committed to continuous learning and eager to contribute in collaborative environments.

PROJECTS

Video Conference web app | *React, Vite, Firebase, ZEGOCLOUD, Redux Toolkit*

GitHub: <https://github.com/marklaroya/UpFace>

- Developed and deployed a React-based video conferencing application supporting real-time video and audio communication.
- Integrated ZEGOCLOUD for real-time media streaming and Firebase Authentication for secure user login.
- Implemented responsive layouts and UI components to ensure usability across devices.

Simple Backup Web App (Self-Hosted) | *React, Node.js, Express, Multer, Ubuntu, Docker, CORS*

GitHub: <https://github.com/marklaroya/SimpleBackupApp>

- Built and deployed a self-hosted file backup system on Ubuntu, simulating a production-style backend environment.
- Developed REST endpoints for file upload and retrieval using Node.js and Express.
- Implemented secure file handling with Multer and configured server-side storage directories.
- Managed application deployment on a personal Linux server, handling environment variables and CORS configuration.

PROFESSIONAL EXPERIENCE

Network Support Engineer

Makati City, Philippines

Integrated BigData Technologies Corp

April 2022 - January 2026

- Monitored network performance and incidents, reducing average downtime by 25% through data analysis, reporting, and coordination with ISPs.
- Used advanced CLI skills with PuTTY to configure over 100 Teldat routers, deploying Dual WAN technology nationwide and improving network redundancy.
- Installed, configured, and maintained network devices, ensuring 100% compliance with technical standards and enhancing overall system stability.
- Developed a configuration generator for Teldat routers, automating IP assignments and reducing manual setup errors, significantly improving deployment efficiency.
- Applied problem-solving, scripting, and debugging skills transferable to software engineering.

EDUCATION

Bachelor of Science in Information Technology

2018 - 2022

Arellano University

SKILLS

Languages: JavaScript ES6+, TypeScript(basic), Python (basic)

Frontend: React, Vite, Next.js, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs

Databases & Auth: NoSQL (MongoDB), MySQL (basic), Supabase (basic), Firebase (Auth, Firestore)

Tools & Platforms: Git, GitHub, Docker, Linux CLI (basic), Vercel, Netlify
