SUMMARY

Junior Software Engineer with hands-on experience building and deploying web applications using React, Node.js, and Firebase. Strong foundation in frontend development, REST APIs, and NoSQL databases, with a professional background in network engineering and production systems. Experienced in automation, troubleshooting, and working in real-world environments. Actively seeking a Junior Software Engineer or Frontend Engineer role.

PROJECTS

Video Conference web app

GitHub: <https://github.com/marklaroya/UpFace>

- Developed and deployed a React-based video conferencing application supporting real-time video and audio communication.
- Integrated ZEGOCLOUD for real-time media streaming and Firebase Authentication for secure user login.
- Implemented responsive layouts and UI components to ensure usability across devices.

Tech Stack: React, Vite, Firebase, ZEGOCLOUD, Redux Toolkit.

Personal portfolio website

GitHub: https://github.com/marklaroya/PortFolio_Web

- Designed and developed a personal portfolio website to showcase projects, skills, and experience.
- Optimized for fast load times, animations, and responsive design using Next.js and TypeScript.
- Implemented a modern, accessible UI using Tailwind CSS and Shadcn UI, with smooth animations via Framer Motion.
- Showcases a dynamic collection of projects with links to source code on GitHub and interactive demos for hands-on exploration.

Tech Stack: React, TypeScript, Next.js, Shadcn, Tailwind CSS.

PROFESSIONAL EXPERIENCE

Network Support Engineer

Makati City, Philippines

Integrated BigData Technologies Corp

04/2022 - 01/2026

- Monitored network performance and incidents, reducing average downtime by 25% through data analysis, reporting, and coordination with ISPs.
- Leveraged advanced CLI skills with Putty to configure over 100 Teldat routers, implementing Dual WAN technology for nationwide deployment.
- Installed, configured, and maintained network devices, ensuring 100% compliance with technical standards and enhancing overall system stability.
- Developed a configuration generator for Teldat routers, automating IP assignments and reducing manual setup errors, significantly improving deployment efficiency.
- Applied problem-solving, scripting, and debugging skills transferable to software engineering.

EDUCATION

Bachelor of Science in Information Technology

2018 - 2022

Arellano University

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python (basic)

Frontend: React, Next.js, HTML, CSS

Backend: Node.js, Express.js, REST APIs

Databases & Auth: MongoDB, Supabase (basic), Firebase (Auth, Firestore)

Tools & Platforms: Git, GitHub, Docker (basic), Linux CLI (basic), Vercel, Netlify

Infrastructure & Networking (Background): TCP/IP, VLANs, VPN (IPsec), Routing & Switching, BGP, Dual WAN Configuration, Network Monitoring
