SUMMARY

Software Developer with hands-on experience building and deploying web applications using JavaScript, React, Node.js, and TypeScript. Background in IT and network support, bringing strong troubleshooting, automation, and analytical thinking skills to software development

PROJECTS

Personal portfolio website 2025 - Present
<https://laroyaportfolio.netlify.app/>

- Designed and developed a personal portfolio website to showcase projects, skills, and experience.
- Optimized for fast load times, animations, and responsive design using Next.js and TypeScript.
- Implemented a modern, accessible UI using Tailwind CSS and Shadcn UI, with smooth animations via Framer Motion.
- Showcases a dynamic collection of projects with links to source code on GitHub and interactive demos for hands-on exploration.
- Tech Stack: React, TypeScript, Next.js, Shadcn, Tailwind CSS.

Video Conference web app 2024
<https://up-face.vercel.app/>

- Developed and deployed a React-based video conferencing application supporting real-time video and audio communication.
- Integrated ZEGOCLOUD for real-time media streaming and Firebase Authentication for secure user login.
- Implemented responsive layouts and UI components to ensure usability across devices.
- Tech Stack: React, Vite, Firebase, ZEGOCLOUD, Redux Toolkit.

KEY ACHIEVEMENTS

Portfolio Website
Developed and launched a responsive portfolio site showcasing personal projects

Network Optimization
Created a configuration generator for new store router deployments, streamlining the process from manual template editing to parameter-based config file generation.

EXPERIENCE

Network Support Engineer Makati City, Philippines
Integrated BigData Technologies Corp 2022 - 2026

- Monitored network performance and incidents, reducing average downtime by 25% through data analysis, reporting, and coordination with ISPs.
- Leveraged advanced CLI skills with Putty to configure over 100 Teldat routers, implementing Dual WAN technology for nationwide deployment.
- Supported installation, configuration, and maintenance of network devices, ensuring system stability and adherence to technical standards.
- Developed a configuration generator tool to generate configuration for new teldat router deployments, reducing manual configuration time by templating IP assignments and eliminating human error in new site setups.

EDUCATION

Bachelor of Science in Information Technology Pasay Campus
Arellano University 2018 - 2022

SKILLS

Tools & Platforms: Git, GitHub, Vercel, Netlify

Frontend: JavaScript, React, TypeScript, HTML5, CSS3

Programming: Java, C/C++, Python

Backend: Node.js, Supabase, Firebase
